

SHARP

UP-3301

Sharp proudly presents a smart, easy-to-use, practical POS terminal developed specifically for time-sensitive restaurants, fast food outlets and convenience stores.

- ✓ Easy-to-operate touch screen LCD POS terminal
- ✓ Small foot print with built-in printer option
- ✓ Ethernet LAN I/F as standard for real time reporting
- ✓ Optional contactless key

SHARP

FOCUS ON UP-3301

This easy-to-use, practical Sharp UP-3301 full colour, touch screen terminal has been specifically designed for busy, time-sensitive businesses.

Compact and unobtrusive, the UP-3301 readily fits into any environment where it has all the right ingredients for maximum impact.

A parameter-driven terminal, it is easy to install and set up and requires minimal employee training in industries known for high staff turnover. A highly visible 10.4" LCD touch screen displays a common-sense menu using colour codes to group products together. Transactions can be entered, quickly, efficiently and accurately, with the minimum of fuss.

Powerful features include an Ethernet LAN I/F for real time communications connections to back office (or remote office via the internet) software for sales analysis and management reports and fast, easy input to accounting packages.

Additionally, this Euro-compatible terminal has customer-friendly features, including table transfer, bill splitting and mix and match capabilities.

There are a whole host of other options to optimise the way the UP-3301 helps you do business.

* For internet or pc communications other equipment is necessary
